

PLEASE NOTE

THE METROPOLITAN ST. LOUIS SEWER DISTRICT
WILL BE CREEK CLEANING
IN YOUR AREA

Site:	Moline Creek
ID #:	MOD 980631162
Break:	13.1
Other:	N/A

To help protect your home and property from flooding and erosion, the natural creek channels in your immediate neighborhood will be cleaned by crews working for MSD, beginning on or about

The channels are to be cleared of shrubs, weeds, trees, silt, sand and gravel bars, and all debris--everything that interferes with the flow of stormwater, causing an overload in the channel, flooding and erosion.

The work will include the use of trucks, dumpsters, and other equipment, along with the crews working in the creek. It is our intent to carry this out with the least possible inconvenience to you. The result will be a direct benefit at no additional cost to you. We will greatly appreciate your understanding and cooperation.

This is the beginning of an extensive and continuing creek cleaning program by MSD. But it will be worthwhile only so long as the results last. SO PLEASE....

HELP KEEP YOUR CREEKS CLEAN!

If you have questions, please call MSD at 768-6209.
